WEEK 7 PROJECT ASSIGNMENT

WHAT TO SUBMIT:
- An executed "show tables" statement (including the results)
- An executed "describe <tablename>" statement (including results) for each/all of your tables.
- Any script(s) you use to manipulate the data.
- The SQL command(S) that generates the following reports.
- The actual results of the above-referenced SQL statement(s) (include all of the data).

HOW YOUR OUTPUT SHOULD LOOK + EXAMPLE ROWS

NOTES:
- You don't have to have the alternating color, that's just there to make it easy to view.
- Your column names might be different.
- The format can be slightly different, but the data, the sort order, and the order of the columns has to match.
- There should be many more rows than this.

FIRST, YOU WILL NEED A LIST OF DEPARTMENT MANAGERS; GET THESE INTO YOUR DATA HOWEVER YOU WANT.
